Achievements/Tasks

- **Thali Application (front-end project) - Basically, it is a Thali order system in which you can prepare your thali from the menu, put that menu items in your cart and place the order. A single page application, fully responsive UI is designed. Where I used Following Technologies : HTML5, CSS, JavaScript, React with Redux toolkit.** Link-

- **Inventory Management App - Inventory management refers to the process of ordering, storing, and selling a company's inventory. In this App we tracks orders, manages products ,customers, and sellers Its a full stack Mern project where we used node Express for making api's and for client side we used React.js .** Link-

- **Employee management system - In the employee management system, you can manage admin activities in an easier and quicker way. Employees are an important part of your organisation; it is their work that ultimately contributes to the bottom line of the company. It is an important part of HR management. It also helps to employee engagement with company in this app I used Following Technologies : HTML5, CSS, JavaScript, Node js , Express js, MySQL, template engine (express handlebar) .** Link-
